

**2nd Annual
Farmscaping with Native Plants Field Day**
Tuesday, June 1st, 2010 NRCS, Plant Materials Center
Corvallis Oregon
1:00-5:00 P.M.

Interested in learning about beneficial insects & native pollinators and the habitats that supports them?

Always wanted to learn more about Oregon's native plants and how to grow them?

Think you should be complying with farm biodiversity standards and/or signing up for interesting conservation programs, but not sure how farm biodiversity fits in your farm production plan?

TO REGISTER CONTACT:

Gwendolyn Ellen

The conservation experts at the Natural Resources Conservation Service, Plant Materials Center in Corvallis are teaming up with Oregon State researchers, native plant retailers, and insect enthusiasts to bring you a **very special field day.**

Come join us and:

- see flowering native plants that can be used in on-farm habitat
- tour a demonstration hedgerow and fields of native flowers
- learn first-hand the ecology and identification of native pollinators and beneficial insects
- learn how to propagate and grow native plants
- and visit with folks from Seven Oaks Nursery, and PNW Native Seeds, and Heritage Seedlings
